MiniWeed

row cleaner for
mini-loaders

MiniWeed

MiniWeed is a whole new implement for mechanical weed control for both cereals and maize.

The frame is available in 3 and 4,5 m working widths. The front mounted frame ensures easy steering and control of the implement.

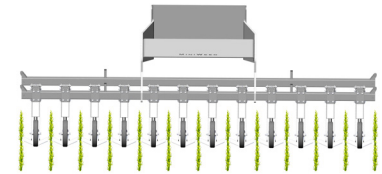

Every single share is individually connected to a parallelogram with its own depth control wheel, ensuring a uniform working depth.

Advantages:

- Perfect for smaller farms
- Inexpensive, simple and economical
- Precise steering with a great overview of the implement and work process
- Compatible with all mini-loaders
- Low weight
- The cleaning section's working width can be adjusted from 25 to 75 cm
- Easily changeable between 25 and 75 cm row widths
- Every share is individually mounted which ensures a uniform working depth

MiniWeed 3000:

A 3 m stiff boom for row cleaning between 4 – 5 maize rows of 75 cm or for cleaning between 3 m cereals with a 25 cm row width (illustrated).

MiniWeed 4500:

A 4,5 m frame with 2 foldable wings for row cleaning between 7 maize rows of 75 cm (illustrated) or between 4 m cereals with a 25 cm row width.

Development

The product is developed by **AGROINTELLI** as a part of the Optimek, NewCut and RowCrop projects, co-financed by GUDP.
