

SCANMEK STRAW SPREADER

The spreader is designed to evenly distribute straw in resting stalls in cattle sheds. It is also ideal for spreading straws on the floors at poultry farms.

The spreader can be equipped with scraper and side-mounted brush, allowing it to scrape slatted flooring and brush stalls in a single operation.

The shovel contains a stirrer which prevents clumping of the material.

Connection: 2 x 1/2"
Oil requirement: 30 ltr/min.
